

## ERRATA:

### THE SPECTRUM OF HISTOLOGICALLY DIAGNOSED MALIGNANT NEOPLASMS IN SABAH, 1983 – 1988

*J. Ganesan, S. S. Pillai, H. R. Gudum*

In the above article published in the Medical Journal of Malaysia, June 1991, Vol 46, No 2, pages 116–122, Tables IV, V and VI were inadvertently omitted. The tables are reproduced below:

**Table IV**  
Five Most Common Malignancies in Kadazan Patients

Site	Male		Site	Female	
	Number of cases	% of all male Kadazan cases		Number of cases	% of all female Kadazan cases
Nasopharynx	53	19.9	Breast	37	15.6
Stomach	46	17.2	Cervix	32	13.5
Skin (incl. melanoma)	30	11.2	Stomach	31	13.1
Liver	21	7.9	Nasopharynx	22	9.3
Oral Cavity	18	6.7	Skin (incl. melanoma)	17	7.2
<b>All sites</b>	<b>267</b>	<b>100.0</b>	<b>All sites</b>	<b>237</b>	<b>100.0</b>

**Table V**  
Five Most Common Malignancies in all indigenous groups other than Kadazans (i.e. Bajaus, Muruts and other indigenous)

Site	Male		Site	Female	
	Number of cases	% of all male Kadazan cases		Number of cases	% of all female Kadazan cases
Nasopharynx	21	11.9	Breast	29	14.6
Skin (incl. melanoma)	21	11.9	Cervix	28	13.1
Liver	16	9.1	Ovary	23	11.6
Lympho-recticular	16	9.1	Thyroid	23	11.6
Nasopharynx	12	6.8	Skin (incl. melanoma)	16	8.1
<b>All sites</b>	<b>176</b>	<b>100.0</b>	<b>All sites</b>	<b>198</b>	<b>100.0</b>

**Table VI**  
Five Most Common Malignancies in Chinese Patients

Site	Number of cases	% of all male Chinese cases	Site	Number of cases	% of all female Chinese cases
Lung	30	14.3	Breast	41	19.8
Colon	23	11.0	Colon	22	10.6
Stomach	22	10.5	Rectum	14	6.8
Skin (incl. melanoma)	19	9.1	Ovary	13	6.3
<b>All sites</b>	<b>210</b>	<b>100.0</b>	<b>All sites</b>	<b>207</b>	<b>100.0</b>
